

Geotechnical Professional Engineer: 7 – 10 Years Experience

Employee Type: Full Time

The Geotechnical PE will be working on both small and large-scale challenging projects and must have diverse and proven geotechnical engineering experience in the New York Metropolitan area. The candidate must have strong technical skills, the ability to lead staff, and the ability and desire to develop new clients and expand services to existing clients. The candidate will be responsible for preparing proposals, technical reports, specifications, construction plans, and comprehensive geotechnical recommendations. The candidate must have had previous diverse field experience associated with subsurface investigations and foundation construction. In addition, the candidate will be responsible for planning and executing project tasks, reviewing the work of staff, mentoring, managing performance, and interacting with managers of the firm.

Requirements:

- BS or MS degree with geotechnical specialty;
- New York PE license required;
- Minimum 7 years of geotechnical consulting experience;
- Strong familiarity with IBC and NYC Building Codes;
- Strong leadership and decision-making skills;
- Excellent presentation and report writing skills;
- Excellent verbal and written communication skills;
- Must be flexible and self-motivated;
- Possess a valid driver's license in good standing.

If you are a highly motivated self-starter, we can offer you the challenge, responsibility, and compensation that you deserve!

We offer employees competitive salaries, medical, dental, life insurance, short/long-term disability insurance, and after one year of service a 401(k) Retirement Plan.
